Signal word

Hazard statements

Warning

H226 Flammable liquid and vapour.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H335 May cause respiratory irritation.

H373 May cause damage to organs through prolonged or repeated exposure.

H411 Toxic to aquatic life with long lasting effects.

| diiron trioxide                                                                                                                                                                                            |                                                                                                                                     | 30-60%                                                                                     |

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

| Inhalation   | Move affected person to fresh air at once. Get medical attention if any discomfort continues.                                                          |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ingestion    | Do not induce vomiting. Keep affected person warm and at rest. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. |
| Skin contact | Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if any discomfort continues.                         |
| Eye contact  | Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.                  |

| Protection of first aiders                       | First aid personnel should wear appropriate protective equipment during any rescue. It may<br>be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation. Wash<br>contaminated clothing thoroughly with water before removing it from the affected person, or<br>wear gloves.                                                                                                                                                                                                                                                                 |  |  |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| 4.2. Most important symptoms                     | and effects, both acute and delayed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |  |
| Inhalation                                       | Vapours may cause drowsiness and dizziness. Headache. Nausea, vomiting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |
| Ingestion                                        | May cause discomfort if swallowed. Diarrhoea. Nausea, vomiting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
| Skin contact                                     | Prolonged contact may cause redness, irritation and dry skin.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |  |
| Eye contact                                      | Irritation of eyes and mucous membranes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |  |
| 4.3. Indication of any immediat                  | e medical attention and special treatment needed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |
| Notes for the doctor                             | Treat symptomatically.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |
| Specific treatments                              | No specific chemical antidote is known to be required after exposure to this product.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |
| SECTION 5: Firefighting measure                  | ures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |
| 5.1. Extinguishing media                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
| Suitable extinguishing media                     | Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |
| Unsuitable extinguishing media                   | Do not use water jet as an extinguisher, as this will spread the fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |
| 5.2. Special hazards arising fro                 | m the substance or mixture                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |
| Specific hazards                                 | The product is flammable. Fire-water run-off in sewers may create fire or explosion hazard. Vapours are heavier than air and may spread near ground and travel a considerable distance to a source of ignition and flash back. Control run-off water by containing and keeping it out of sewers and watercourses.                                                                                                                                                                                                                                                 |  |  |
| Hazardous combustion<br>products                 | Thermal decomposition or combustion products may include the following substances:<br>Carbon dioxide (CO2). Carbon monoxide (CO). Acrid smoke or fumes. Metal oxide(s). Oxides<br>of nitrogen.                                                                                                                                                                                                                                                                                                                                                                    |  |  |
| 5.3. Advice for firefighters                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
| Protective actions during firefighting           | In case of fire: Evacuate area. No action shall be taken without appropriate training or involving any personal risk. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk.                                                                                                                                                                                                                                                                                                                         |  |  |
| Special protective equipment<br>for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.                                                                                                                                                                                                                                                                              |  |  |
| SECTION 6: Accidental release measures           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
| 6.1. Personal precautions, prot                  | ective equipment and emergency procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |
| For non-emergency personnel                      | No action shall be taken without appropriate training or involving any personal risk. Evacuate area. Keep unnecessary and unprotected personnel away from the spillage. Do not touch or walk into spilled material. Eliminate all ignition sources if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Do not breathe gas, fume, vapours or spray. Provide adequate ventilation. If ventilation is inadequate, suitable respiratory protection must be worn. Use protective equipment appropriate for surrounding materials. |  |  |
| For emergency responders                         | Wear protective clothing as described in Section 8 of this safety data sheet.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |  |

6.2. Environmental precautions

| Environmental precautions                                         | Avoid the spillage or runoff entering drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

| 7.1. Precautions for safe handl                                   | ing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| Usage precautions                                                 | For professional users only. Eliminate all sources of ignition. Use only in well-ventilated areas.<br>Wear protective clothing as described in Section 8 of this safety data sheet. Earth container<br>and transfer equipment to eliminate sparks from static electricity. For the greatest protection,<br>clothing should include anti-static overalls, boots and gloves. Use only non-sparking tools.<br>Keep away from heat, sparks and open flame. Avoid inhalation of vapours/spray and contact<br>with skin and eyes. Inhalation of dust during cutting, grinding or sanding operations involving<br>this product may cause irritation of the respiratory tract. |  |
| Advice on general<br>occupational hygiene                         | Do not eat, drink or smoke when using this product. Good personal hygiene procedures should be implemented. Wash hands thoroughly after handling. Take off contaminated clothing and wash it before reuse. Remove contaminated clothing and protective equipment before entering eating areas. Change work clothing daily before leaving workplace.                                                                                                                                                                                                                                                                                                                    |  |
| 7.2. Conditions for safe storage, including any incompatibilities |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| Storage precautions                                               | Store at temperatures between 10°C and 25°C. Store in accordance with national regulations. Store in tightly-closed, original container. Avoid contact with oxidising agents.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

Control parameters                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

#### Occupational exposure limits

#### xylene

Long-term exposure limit (8-hour TWA): WEL 50 ppm 220 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 100 ppm 441 mg/m<sup>3</sup> Sk

#### diiron trioxide

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 5 mg/m<sup>3</sup> fume Short-term exposure limit (15-minute): WEL 10 mg/m<sup>3</sup> fume as Fe

#### ethanol

Long-term exposure limit (8-hour TWA): WEL 1000 ppm 1920 mg/m<sup>3</sup>

#### methanol

Long-term exposure limit (8-hour TWA): WEL 200 ppm 266 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 250 ppm 333 mg/m<sup>3</sup> Sk

WEL = Workplace Exposure Limit. Sk = Can be absorbed through the skin.

#### xylene (CAS: 1330-20-7)

Exposure controls           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Protective equipment             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Appropriate engineering controls | As this product contains ingredients with exposure limits, process enclosures, local exhaust ventilation or other engineering controls should be used to keep worker exposure below any statutory or recommended limits, if use generates dust, fumes, gas, vapour or mist. Use explosion-proof ventilating equipment.                                                                                                                                                                                                                                   |
| Eye/face protection              | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Chemical splash goggles or face shield. If inhalation hazards exist, a full-face respirator may be required instead.                                                                                                                                                                                                            |
| Hand protection                  | To protect hands from chemicals, gloves should comply with European Standard EN374. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. For exposure up to 8 hours, wear gloves made of the following material: Nitrile rubber. |
| Other skin and body protection   | Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact. Wear suitable protective equipment for prolonged exposure and/or high concentrations of vapours, spray or mist. For the greatest protection, clothing should                                                                                                                                                                                                                                                                            |

wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact. Wear suitable protective equipment for prolonged exposure and/or high concentrations of vapours, spray or mist. For the greatest protection, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for information on material and design requirements and test methods.

Hygiene measuresGood personal hygiene procedures should be implemented. Wash hands thoroughly after<br/>handling. Wash promptly with soap and water if skin becomes contaminated. Promptly<br/>remove any clothing that becomes contaminated. Care should be taken to avoid contact with<br/>contaminants when removing contaminated clothing. Remove contaminated clothing and<br/>protective equipment before entering eating areas. Use appropriate skin cream to prevent<br/>drying of skin. When using do not eat, drink or smoke.

**Respiratory protection** Respirator selection must be based on exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Environmental exposure Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Keep container tightly sealed when not in use. Residues and empty containers should be taken care of as hazardous waste according to local and national provisions.

| 13.1. Waste treatment methods     |                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| General information               | Disposal of this product, process solutions, residues and by-products should at all times<br>comply with the requirements of environmental protection and waste disposal legislation and<br>any local authority requirements. Waste is classified as hazardous waste. Waste, residues,<br>empty containers, discarded work clothes and contaminated cleaning materials should be<br>collected in designated containers, labelled with their contents. |  |
| Disposal methods                  | Residues and empty containers should be taken care of as hazardous waste according to local and national provisions. Do not empty into drains.                                                                                                                                                                                                                                                                                                        |  |
| Waste class                       | 08 01 11 Waste paint and varnish containing organic solvents or other dangerous substances If this product is mixed with other wastes, this code may no longer apply. If mixed with other wastes, the appropriate code should be assigned. For further information, contact your local waste authority.                                                                                                                                               |  |
